

Interior

1. Interior

- a. Pest Control – Bel Mare has a built-in system that treats for pests. If you encounter an infestation, please issue a work order so our contractor can come to investigate. Most occurrences of infestation are the result of moving boxes that are left in your home. It is important not to store moving boxes in your home. This can create a nuisance to both you and your neighbors.**

- b. Walls and Ceiling (water intrusion) – You should inspect all walls and ceilings for possible water stains on a regular basis. If staining is found, this could be the result of exterior water leaks or a neighbor’s malfunction. If you encounter a water stain, report it to building management immediately.**
