

SOUND PROOFING POLICY

In order to minimize sound transmittal between Units, any replacement flooring must be set upon a sound proofing bed that meets or exceeds the Associations requirement of Field Impact Isolation Class 55. Unit Owners / Tenants must obtain written Board approval before removing or replacing flooring. Requests must be submitted in writing to the Bel Mare Management Office along with proof that the new flooring meets the requirements. Proof can be a written statement from the manufacturer or the report of an independent testing agency or reasonable equivalent.
